CO-MANAGEMENT PORTFOLIO

Michael H. Manning, M.D., F.A.C.S.

Certified by the American Board of Ophthalmology, Dr. Michael Manning is a recognized leader in the fields of cataract surgery, refractive surgery, and cosmetic eyelid surgery. In addition to his leadership of Gulfcoast Eye Care. Dr. Manning earned his MD at the University of South Florida College of Medicine. He completed his Internal Medicine Internship Year at that same institution, followed by his Ophthalmology Residency at the University of South Carolina School of Medicine.

In addition to giving presentations at many national and international Ophthalmology conferences, Dr. Manning has written or co-written numerous publications. His work has included a chapter in Albert & Jakobiec's Principles & Practice of Ophthalmology (3rd edition). The Journal of the American Medical Association has called that textbook "the current standard in comprehensive ophthalmology textbooks."

Jason M. Handza, D.O.

Dr. Jason Handza is a board-certified Ophthalmologist and fellowship-trained Vitreoretinal Surgeon offering a range of retinal treatments at Gulfcoast Eye Care. Dr. Handza earned his medical degree from the Philadelphia College of Osteopathic Medicine, graduating with honors. He later completed his fellowship in vitreoretinal surgery at the University of South Florida Eye Institute, training under some of the leading experts in retinal surgery and ophthalmology.

Chelsey Knapper, D.O.

Dr. Chelsey Knapper is a highly skilled oculofacial plastic surgeon. She began her academic journey at Calvin College in Grand Rapids, Michigan, where she completed her Bachelor of Science in Biology, as well as minors in Biochemistry and Dance. Her passion for medicine led her to Liberty University College of Osteopathic Medicine in Lynchburg, Virginia, where she was awarded her Doctorate of Osteopathic Medicine.

The Gulfcoast Eye Care team is made up only of highly trained, experienced physicians, technicians and support staff.

Our areas of expertise include:

BENEFITS OF PARTNERING WITH GULFCOAST EYE CARE

-  **OUR PARTNERS ARE A PRIORITY** – We are committed to building strong, lasting relationships for the benefit of our shared patients.
-  **EXCEPTIONAL EXPERIENCE** – Celebrating over 35 years of vision care excellence with thousands of refractive procedures performed.
-  **EXCEPTIONAL RESULTS** – Our team is continuously focused on patient outcomes and striving for the best possible results. We track and record data which is available for our partners at any time.
-  **QUALITY PERSONAL PATIENT CARE** – You can rest assured your patients receive the same personal touch and care with us that they have been accustomed to at your practice. We understand that who you refer your patients to is a reflection of your practice as well and we respect that relationship.
-  **STATE-OF-THE-ART TECHNOLOGY** – We are committed to offering the most advanced technology and procedures, whether chosen or not, we want our patients to have access to the options that can help meet their visual goals.
-  **COMMUNICATION IS KEY** – With a direct line exclusive for our Partners in Vision, dedicated staff members ready to help, and open door communication with our surgeons, Gulfcoast Eye Care is committed to a team approach for a successful patient experience.
-  **LEADERS IN THE INDUSTRY** – Gulfcoast Eye Care was one of the first practices in the area to introduce multifocal lens implants over 25 years ago, and was the first practice in Florida to offer LipiFlow® Dry Eye treatment.
-  **HONEST AND INTEGRITY** – Much of the success of vision correction surgery depends not just on the technology used and the skill of the surgeon, but also on the proper patient selection for each respective procedure. We are upfront anytime that we find a person's eyes are not well suited to a particular procedure, so that we can achieve the most desirable outcome possible.

PROVIDING EXCELLENCE IN EVERY ASPECT OF EYE CARE

GULFCOAST EYE CARE

ALL-LASER CUSTOM LASIK

BEING LEAR has never been easier!

YOUR ALL-LASER CUSTOM LASIK PROCEDURE

Step One
Using WaveScan technology, we take a "fingerprint" of your eye and your optical path that is called a WavePrint map. This detailed information is evaluated by the surgeon.

Step Two
A laser is used to gently create a corneal flap with the safety and precision of a computer controlled laser beam. The surgeon then folds the flap back to prepare the eye for the treatment laser.

Step Three
The surgeon uses an Excimer Laser to gently and precisely reshape the cornea so that light is more sharply focused on the retina.

Step Four
Finally, the protective flap that was created in Step Two is gently moved back in its original position and begins to heal immediately.

Wavelight
FS200 Excimer Laser

The FS200 Excimer Laser offers a variety of features including eye tracking technology that tracks at speeds 10x faster than movements of your eye for exact position and treatment, and PerfectPhase Technology ensuring every pulse is completely controlled for a truly customized procedure. Plus, as the only laser providing Wavefront Optimized treatments, it provides patients with the possibility for better night vision and offers the largest approval range of treatments, meaning more patients are candidates than ever before!

Wavelight
FS200 Femtosecond Laser

The FS200 Femtosecond Laser is an integral component of the Wavelight Perfecting Suite. By eliminating the blade once used in traditional LASIK, our patients enjoy a premium level of safety and accuracy. In addition, as the fastest laser platform in the U.S., it is able to provide you with the benefit of less procedure time, less irritation and more gentle treatments.

ALL-LASER CUSTOM LASIK?
is one of the most popular due to its accuracy, safety, range of correction and advanced LASIK technology of prescriptions – including astigmatism, making most people good candidates.

CALL (727) 695-2020 OR VISIT GULFCOASTEYECARE.COM TO SCHEDULE YOUR LASIK CONSULTATION!

START REALIZING A LIFETIME OF SAVINGS WITH LASIK!

What's the cost of great vision? Depending on your prescription, your contacts & glasses can cost anywhere from \$300 - \$800 per year!

	PER YEAR	10 YEARS
Contacts	\$300 - \$400	\$3000 - \$4000

ANCED LIFESTYLE LENSES

ements in technology, there y options available to renew Today's cataract surgery has I to not only eliminate your put also allow you to regain your vision.

For patients wanting to ves of cataracts while also e visual independence, Eye Care is happy to offer Lifestyle Lenses.

- Basic Monofocal Lens**
A monofocal lens may improve your distance vision. It does not correct for astigmatism, and you will still require glasses for distance and near activities.
- Astigmatism Correcting Lens**
A toric lens is designed to correct moderate to high astigmatism, providing patients with clearer distance vision, often without glasses.
- Multifocal/Accommodating Lens**
A multifocal or accommodating lens is a premium implant that can restore your ability to focus on objects at more than one distance including the close vision needed for tasks such as reading, computer work, or trying a fishing lure. Which distance are clearest will depend upon the type of lens chosen.

With an Advanced Lifestyle Lens, you may be able to go well beyond!
